Working with file encodings

fileencodings option: encoding tried when writing to file
fileencoding option: encoding used to write to file

```
' Set fileencodings in vimrc
set fileencodings=utf-8,sjis

' Set encoding to use when writing
set fileencoding=sjis

' Open file with encoding
edit ++enc=utf-8 ++ff=unix myfile.txt     ' open new file
edit ++enc=utf-8                          ' reopen current filel

" Check actual encoding used
:set encoding?
```

*) non-utf-8 Japanese encodings

```
" Read encodings
set fileencodings=utf-8,ccp932,euc-jp,sjis

" Write encoding
set fileencoding=sjis
```
